- No Transaction Fees

– starting at \$19.99/month

Overview:

CheckWriter Cloud™ is a stand alone system, hosted on a secure cloud server, rather than your own PC like CheckWriter Classic™. It works on any PC, Mac or Tablet through a web browser.

CheckWriter Cloud™ allows any business or personal 'dba' to take checks by phone, fax, or online from customers, and then create a physical draft of the payment for immediate deposit at full face value, with no fees.

It works with any deposit method including Remote Deposit Capture, Desktop Deposits, Direct Scan ATMs, Smart Phone Deposit, Lockbox Service, and most Check21 compliant deposit solutions, as well as working with the old fashioned deposits if you want to bring them to the teller, use the night drop, or drive through window.

Deposits should credit to your ledger balance the same day, at full face value, without fees.

You control CheckWriter Cloud™ You never give your customer's payment details, or trust your funds to a third party. There is no settlement wait time.

CheckWriter Cloud™ draft deposits are treated just like regular checks that you receive in the mail, or over the counter. That are accepted at all banks.

Printing:

Use any laser printer and CheckWriter Cloud™ Check 21 compliant Blank Check Stock

- Print on "Top Check" or "3-per-page"

Just put the standard size paper into your paper tray, queue the check, or batch of checks you want to draft, then click print.

Cloud Drafts will be perfectly aligned to any printer you use and can be deposited in to any bank in the U.S.A., immediately.
